परीक्षक के हस्ताक्षर.....संकेतांक 28683

प्रमाणित किया जाता है कि इस उत्तर पुस्तक के निर्माण में बोर्ड द्वारा प्रदत्त 58 जी.एस.एम. ईको मेपलिथो कागज ही उपयोग में लिया गया है। 179/2024

परीक्षार्थियों के लिए आवश्यक निर्देश

1. समस्त प्रश्नों को हल निर्धारित शब्द सीमा में इसी उत्तर पुस्तिका में करना है। विशेष परिस्थिति में अतिरिक्त उत्तर पुस्तिका, उत्तर पुस्तिका भरी हुई होने पर पर्यवेक्षक एवं वीक्षक की अनुशंसा पर ही उपलब्ध कराई जायेगी।
2. प्रश्न-पत्र पर निर्धारित स्थान पर अपना नामांक लिखें।
3. प्रश्न-पत्र हल करने के पश्चात् जिस पृष्ठ पर हल समाप्त होता है, उस पर अन्त में "समाप्त" लिखकर अन्त के सभी रिक्त पृष्ठों को तिरछी लाईन से काटें।
4. निम्न बातों का विशेष ध्यान रखें अन्यथा अनुचित साधनों की रोकथाम अधिनियम के तहत कार्यवाही की जा सकेगी:-
 - (i) उत्तर पुस्तिका के ऊपर/अन्दर तथा प्रश्नोत्तर के किसी भी भाग में चाही गई सूचना के अलावा अपना नामांक, नाम, पता, फोन नम्बर अथवा पहचान की कोई अन्य प्रकार की सूचना आदि अंकित नहीं करें अन्यथा "अनुचित साधनों के प्रयोग" के अन्तर्गत कार्यवाही की जावेगी।
 - (ii) उत्तर पुस्तिका के पृष्ठों को फाड़ें नहीं। उत्तर-पुस्तिका के मुख पृष्ठ पर अंकित संख्या के अनुसार पृष्ठ पूरे होने चाहिये। परीक्षार्थी उत्तरपुस्तिका प्राप्त करते ही पृष्ठ संख्या की जांच कर लें यदि पृष्ठ कम/अधिक या क्रम में नहीं हैं तो वीक्षक से तुरन्त बदलवा लें।
 - (iii) परीक्षा केन्द्रों पर पुस्तक, लेख, कागज, केलक्यूलेटर, मोबाईल, पेजर आदि किसी भी प्रकार का इलेक्ट्रॉनिक उपकरण तथा किसी भी प्रकार का हथियार आदि ले जाना निषेध है।
 - (iv) वस्त्र, स्केल, ज्यामेट्री बॉक्स पर कुछ भी न लिखकर लावें। टेबल के आस-पास कोई अनुचित सामग्री नहीं होनी चाहिये, इसकी जांच कर लें।
 - (v) अपनी उत्तर पुस्तिका/ग्राफ/मानचित्र आदि परीक्षा भवन से बाहर ले जाना दण्डनीय अपराध है, अतः परीक्षा समाप्ति पर उत्तर पुस्तिका वीक्षक को बिना सौंपे परीक्षा कक्ष नहीं छोड़ें।
5. उत्तरों को क्रमानुसार एक ही स्थान पर लिखें। प्रश्न क्रमांक भी सही अंकित करें, अन्यथा दण्ड स्वरूप परीक्षक को 1 अंक कम करने का अधिकार है। बीच में उत्तर पुस्तिका के पृष्ठ रिक्त न छोड़ें। गणित विषय के लिए रफ कार्य उत्तर पुस्तिका के अंतिम पृष्ठों पर करें तथा तिरछी रेखा से काटें।
6. जहाँ तक हो सके प्रश्न के सभी भाग के उत्तर, उत्तर पुस्तिका में एक ही स्थान पर अंकित करें।
7. भाषा विषयों को छोड़कर शेष सभी विषयों के प्रश्न-पत्र हिन्दी-अंग्रेजी दोनों भाषा में मुद्रित हैं। किसी भी प्रकार की त्रुटि/अन्तर/विरोधाभास होने पर हिन्दी भाषा के प्रश्न को ही सही माना जाये।

(vii) Excess Supply

= (7)

3). Very Short Answer

1

(i) National income refers to the net money value of all the final goods and services produced by the normal residents of a country during a period of one year.

In other words, National Income is the sum total of all income earned by the factors of productions in the form of rent, wages, interest,

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

and profit, during a period of one year i.e., from 1st April to 31st March.

(ii) Net Investment refers to the net addition to the stock of physical capital over a unit period of time.

It is determined by deducting depreciation from Gross Investment

$$\text{Net Investment} = \text{Gross Investment} - \text{Depreciation}$$

(iii) For one ~~year~~ financial year, budget manifesto relates to.

(iv) Gross Primary Deficit = Gross Fiscal Deficit - Net Interest Liabilities

$$= 2000 \text{ crore} - 400 \text{ crore}$$

Gross Primary Deficit = 1600 crore

(v) The reserve bank sells foreign exchange reserves when there is a deficit in Balance of Payment to bridge the gap. This is called official reserve sale. The total reduction in official reserve is called the overall Balance of Payment Deficit.

(vi) Interest rate differential refers to the difference between rate of interest on securities of two countries.

For example - In India, the rate of interest on government bonds is 8% and in China, it is

परीक्षक द्वारा
प्रदत्त अंकप्रश्न

परीक्षार्थी उत्तर

10%, then interest rate differential is 2%.

(vii) Resources means anything which can be used in production of goods and services. They can be natural as well as manmade. Examples - land, labour, Raw materials, Capital etc. Resources are scarce because of which problem of choice arise.

(viii) Positive economics analysis explains how different mechanisms function.

(ix) On the budget line, optimum bundle will be located at the point where the budget line is tangent to an indifference curve and when budget line is tangent to an indifference curve, then absolute value of the slope of budget line and that of indifference curve are one and the same.

$$\frac{P_x}{P_y} = MRS$$

(x) Two determining elements of supply curve of a firm are :-

→ Technological Progress

→ Input Prices or Factors of Production Prices

परीक्षार्थी उत्तर

Section - BShort Answer Questions4. Positive Impacts of Demonetisation are :-(i) Tax administrative measure

Demonetisation is viewed as a tax administrative measure. As, people who had the black money had to come forward to declare their unaccounted income and pay taxes along with a penalty rate.

(ii) Channelised more savings in formal financial system :-

Demonetisation helped in channelising more individual savings into the formal financial system.

As a result, banks had more resources at their disposal which can be used to provide more loans at lower interest rates.

(iii) Creating a cash-less or cash-lite economy :-

Demonetisation helps in instilling in people a common understanding to channel more savings through the formal financial system and thus bringing the transactions to the cash-less economy.

Despite the limitations of non-availability of POS machines, mobile phones and internet connectivity, it helped in introducing a formal economy.

परीक्षार्थी उत्तर

87. Difference between Revaluation and Devaluation

Basis of Distinction	Devaluation	Revaluation
----------------------	-------------	-------------

Meaning

Devaluation refers to increase in price of foreign currency in terms of domestic currency by the government.

Revaluation refers to decrease price of currency terms of domestic by the g

Effect on export / imports

Devaluation results in increase in exports

Revaluation results in increase imports

Example

$1\$ = 50 ₹$

↓

$1\$ = 70 ₹$

$1\$ = ₹$

↓

$1\$ = ₹$

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

9). Trade Balance = Export of goods - Import of goods

$$-50 = \text{Export of goods} - 190$$

$$-50 + 190 = \text{Exports}$$

$$140 = \text{Exports}$$

So, Exports are equal to 140 million dollars.

10). Two Central Problems of Economy are:-

(i) What to produce and in what quantities :-

This problem involves selection of goods to be produced and the quantities to be produced of each selected commodity.

Every economy has limited resources, so it cannot produce all the goods.

This is a problem of allocation of resources.

- What possible commodities to produce - Every economy has to decide whether to have more of consumption goods or investment goods, whether to produce more of food, housing, clothing or luxury goods etc.

- How much to produce - It involves decision regarding quantity to be produced of different selected commodities.

(ii) How to produce

परीक्षक द्वारा
प्रदत्त अंक

प्रश्न
संख्या

परीक्षार्थी उत्तर

- This problem refers to the selection of tech to be used for production of different goods.
- Generally, techniques are classified as -
 - Labour intensive technique in which more labour and less capital is used.
 - Capital intensive technique in which more capital and less labour is used.

It also involves selection of the technology available.

- 11). Giffen goods are special kind of inferior goods in which the negative income effect is stronger than positive substitution effect.

Because of this, law of demand does not apply to Giffen goods. Its demand curve slopes upwards.

Consumers spend a large part of their income on Giffen goods.

Example → If the price of bread increases, consumer starts buying more quantity of bread because of less close substitutes.

परीक्षक द्वारा
प्रदत्त अंक

प्रश्न
संख्या

परीक्षार्थी उत्तर

- 12). Substitute goods refers to the goods which are used in place of one another.
- These goods satisfy the same want and therefore can be used in place of one another with ease.
- Examples :- tea or coffee, petrol or diesel, ink pen or ball pen.

- Since tea and coffee are substitutes of each other, demand for tea rises if the price of coffee increases and the demand for tea falls with fall in price of the coffee.
- Thus, the demand for a good moves in the same direction with the price of its substitutes
- There is a positive or direct relation between the price of a good and demand for a good and price of substitute goods

Price of Substitutes	Demand for good
↑	↑
↓	↓

- 13). Increasing return to scale (IRS)
- When a proportional increase in all inputs simultaneously results in an increase in output by a larger proportion, then production function is said to display increasing return to scale.
- Increasing returns to scale occurs due to economies of scale
 - As long as IRS operates, average cost falls.

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

→ Percentage change in inputs $<$ Percentage change in output

Inputs		Output	Percentage	Percentage
labour	Capital	(Units)	change in inputs	change in output
5	5	100	—	—
8	8	200	60%	100%
10	10	300	25%	50%

★ Through Cobb Douglas Iso Quant Curve

Graph is decreasing $OA > AB > BC$ which means that to produce every extra unit less inputs are required.

★ Through Cobb Douglas Production Function

$$a + b > 1$$

संख्या

परीक्षार्थी उत्तर

- 14). Government imposed lower limit on the price of certain goods and services is called Price floor. Most well known examples are :- minimum wage legislation and agricultural price support programmes. Generally, price floor is fixed above the equilibrium price.

There is excess supply in case of Price floor so government will have to buy the produce at a predetermined price so that price don't fall.

- 15). Break even point refers to the point on supply curve where the firm earns only the normal profit. So, the point of minimum Average cost where the supply curve cuts long run Average cost curve in the long run and short run Average Cost curve in the short run.
 $AR = AC$

परीक्षक द्वारा
प्रदत्त अंक

प्रश्न
संख्या

परीक्षार्थी उत्तर

Normal Profit refers to the profit where the firm earns only enough to cover its costs.

5). Ceteris Parat Paribus assumes that all the other things will remain constant. For example, In demand law we assume all the factors - price of related goods, income, taste and preference constant other than price to understand the effect of one variable more.

6). Inventory Investment Reasons - perfectly
~~Increase in~~ Increase in Demand
 - Unexpected fall in sales.
 - To provide greater customer service
 - to increase stock of finished goods
 - In the time period of Boom.

7). Output Multiplier will be -1 because we assume that $MPS = 1$

As $MPS = 1$ $\frac{100}{100} = \frac{100}{100} = 1$

परीक्षार्थी उत्तर

Long Answer Questions.

16. Circular flow of income refers to the generation of income in the production process, its distribution among factors of production and finally its circulation ~~or~~ from households to producers in the form of consumption expenditure on the goods and services produced by the firm.

→ The two arrows above represents the goods and service market.

The arrow above going from firms to households represents the flow of goods and services

The arrow below represents payment of goods and services made by household to firm.

→ The two arrows at the bottom represents factors of production market.

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

The lower most arrow going from household to firms ~~rep~~ represent factor services rendered by the household to firm.

The arrow above it represents payment made to the factors in the form of rent, wages, interest and profit to households for their factor services.

Conclusion →

- Household get factor payment for their factor services.
- Income earned by households is entirely spent on the goods & services produced by the firm.
- This means, there is no leakage from the economy.

Factor payment by firms = Factor income of households

Total output produced by the firm =
Total consumed by households

Consumption expenditure by ~~firms~~ households
= Production expenditure by firms

17).

Components of Government Budget

Non-Tax Revenue refers to revenue received other than tax revenue.

Non-Tax Revenue is a part of Revenue Receipts

- ★ The Non-Tax Revenue of Central Government mainly consists of.
- Interest received on account of loans

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

- Fines and penalties
- Fees and other receipts for services rendered by the government
- Dividend and profit on investments made by the government.
- Cash grants in aid from international organisations and foreign countries.

18).

परीक्षार्थी उत्तर

Essay type Questions.

20) Functions of Money.(i) Medium of Exchange :-

The first and foremost function of money is that it acts as a medium of exchange. It can be used to make payments for all transactions as money has the quality of general acceptability.

This function of money has removed the major difficulty of lack of double coincidence of wants and other inconveniences associated with barter system.

(ii) Measure of value -

The value of all transactions can be expressed in monetary terms. It also helps in calculating exchange ratios of two goods. For example,

Rupree is the unit of account in India, Dollars in USA, yen in Japan etc.

(iii) Store of value

Money can be used to store wealth.

- Money is not perishable in nature.

- Its storage cost is also considerably lower compared to the prices of other goods.

- It is also acceptable to everyone at

परीक्षक द्वारा प्रदत्त अंक	प्रश्न संख्या	परीक्षार्थी उत्तर
		any point of time because it has the quality of universal acceptability. However, to perform this function well, the value of money must be sufficiently stable. A rising price level may erode the purchasing power of money.
	ch)	<u>Standard of Deferred Payments</u> - Money can act as a standard for payments which are to be made in future. It facilitates credit transactions. - It has simplified the borrowing and lending system. - It has also led to the creation of financial institutions. - Under Barter system, it was difficult for borrowers to find the exact same quality good at the time of repayment but money had overcome that limitation also.
	21)	Change in Budget set due to change in Consumers' Income.
	★	<u>Effect of Increase in Income of Consumer on Budget line.</u> If the income of the consumer increases, with the prices of two goods constant. The consumer will be able to buy more of both goods which were earlier not possible. This will result into shift in the budget line rightward

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

From AB to AB_1 .

The new budget line will be parallel to the original budget line because with the change in income, there is no change in the price of two goods. So, price ratio will remain same and therefore the slopes of budget line will also remain same, resulting in parallel shift.

★ Effect of decrease in income of the consumer on budget set.

If the income of the consumer decreases, with prices of two goods constant, the consumer will be able to buy less commodities than before. due to which budget line will shift right leftward. From AB to A_2B_2

The new budget line will have the same slope of the original budget line because of no change in prices of two goods.

Same slope result in new budget line parallel to the original budget line.

22).

Short Run Marginal Cost.

परीक्षक द्वारा
प्रदत्त अंकप्रश्न
संख्या

परीक्षार्थी उत्तर

Short Run Marginal Cost is U-shaped curve because of Law of Variable Proportion.

→ First stage of Law of Variable Proportion states that as quantity of variable input increases MP of a product increases due to suitability of factor proportions.

This means, the requirement of factors to produce every extra unit decreases, which results in Marginal Cost to fall at initial stage.

(4)

BSEK-179/2024

→ But after a certain level of increase in quantity of variable input, MP of a factor input starts decreasing due to inadequacy of ~~fixed~~ fixed factor relative to the quantity of variable input.

This means, the requirement of factor to ~~increase~~ produce every extra unit increases, which increases the cost too, due to which Marginal Cost starts rising.
